

MRad2 RD

RD illuminated.

Meopta's MRAD 2 RD is featured in the FFP 1-6x24 Optika6. Designed for close range and extended distances, the MRAD 2 RD features a 3 MOA central horseshoe for rapid target acquisition, while the precise central aiming dot makes long range accuracy easy. Windage and elevation holds in the bottom of the reticle are designed for the trajectory of the 5.56x45, making it a perfect companion for MSRs.
